Applicant(s)

KAPLAN, DONALD

Examiner

Jonathan Ouellette

Art Unit

3629

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 04 December 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-109 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-109 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☒ Interview Summary (PTO-413)  
Paper No(s)/Mail Date 20061130.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
2. **Claims 1, 2-9, 11-13, 15-26, 29-47, 49-51, 53-90, 93-101, and 104-106 are rejected under 35 U.S.C. 103 (a) as being unpatentable over DeLorme (US 5,948,040).**
3. As per **independent Claims 1 and 38**, DeLorme discloses a method for providing travel services to a person traveling to a geographic location, comprising: a. providing a database including travel information (TRIPS system), pertaining to one or more geographic locations, wherein any of said information can be selectively retrieved from said database based on the geographic location to which it pertains (Fig.5d, restaurants); b. providing counseling services (C15 L16-22, private business or public agency uses trips system to provide information/counseling to a user via the telephone or over-the-counter), wherein said providing counseling services comprises receiving information regarding said traveler's circumstances (direction of travel) and geographic location, selecting information from said database based on said traveler's circumstances and geographic location, and providing said information to said traveler (Abstract, C32-C34, C71-C75); and c. accessing information from said database at a specific geographic location using a computer terminal, wherein

Art Unit: 3629

information pertaining to said geographic location is automatically uploaded to said computer (Fig.5d, C32-C34, C71-C75).

4. DeLorme fails to expressly disclose saving [database includes] and providing (uploading) weather information, traffic information, road construction information, *terrorism information*, legal information and *suggested vaccinations*.
5. However, DeLorme does disclose saving and providing multitude of travel information to the user (Abstract, Fig. 1C), including one or more services and service information (Abstract, Fig. 1C, who? where? how?; Fig.5D, Restaurants); and it would have been obvious to one of ordinary skill in the art at the time the invention was made to store and provide any information that would be beneficial to travelers (route information, safety information, emergency information), for the purpose of offering a method for providing travel services to a person traveling to a geographic location, with the advantage of increasing system effectiveness and customer service by offering users all the necessary/beneficial information available for their upcoming travel plans.
6. As per Claims 2 and 39, DeLorme discloses wherein said database includes identification information for one or more service providers (Fig. 1C, who? where? how?; Fig.5D, Restaurants).
7. As per Claims 3-6, 22, 29-32, 40-43, 59-62, 75-78, 86, and 93-96, Delorme fails to expressly disclose each and every service provider and corresponding service provided, as described in the claims.
8. However, DeLorme does disclose providing service provider information, to include the services they provide (Abstract, Fig. 1C, who? where? how?, transportation services and

lodging services); and it would have been obvious to one of ordinary skill in the art at the time the invention was made to store and provide any and all information available, that would be beneficial to travelers (local service providers and corresponding services), for the purpose of offering a method for providing travel services to a person traveling to a geographic location, with the advantage of increasing system effectiveness and customer service by offering a large variety of relevant customer travel-related information.

9. As per Claims 7 and 45, DeLorme discloses wherein said identification information comprises name, phone number, and address information.
10. As per Claims 8 and 46, DeLorme discloses providing a phone number, wherein said traveler access said counseling services by calling said phone number (C15 L14-32, via telephone).
11. As per Claims 9 and 47, DeLorme discloses providing an internet web site, wherein said web site is configured to receive information concerning said traveler's circumstances and geographic location, and wherein said web site is operatively coupled to said database of travel information and configured to display said travel information (C10).
12. As per Claims 11 and 49, DeLorme fails to expressly disclose providing said traveler with a mobile phone including a button configured to transmit the geographic location of said traveler upon depression of said button.
13. However, Delorme does disclose the use of a mobile communication device (phone) with an emergency "push button" (C30 L50-56, "dumbed-down" push button system for rescue services; C74 L11-15, the button could be the routing button) and the ability for the Trips system to automatically determine the devices location through GPS (C37 L58-65, C72 L1-6, GPS), and it would have been obvious to one of ordinary skill in the art at the time the

Art Unit: 3629

invention was made to provide the travel user with a phone that would be compatible with the Trips system, in order to increase system effectiveness and customer service by providing users with the tools necessary to use the travel information system (software, Phone, Computer, etc.).

14. As per Claims 12 and 50, DeLorme discloses wherein in response to a depression of said button of said mobile phone, a provider of rescue services is dispatched to said geographic location of said traveler (C30 L50-56, "dumbed-down" push button system for rescue services; C74 L11-15, the button could be the routing button)
15. DeLorme fails to expressly disclose whereupon said traveler is transported by said provider of rescue service from said geographic location to a location of greater safety.
16. However, DeLorme does disclose the ability to request help from rescue services (C30 L50-56), and it would have been obvious for the rescue service personnel to transport the user to a location of greater safety, as it is the obvious role of rescue service/ambulance to provide transport of victims to rescue facility (location of greater safety).
17. As per Claims 13 and 51, DeLorme fails to expressly disclose providing said traveler with a password, wherein prior to said transporting of said traveler by said provider of rescue service, said traveler provides said password to said provider of rescue service.
18. However, Delorme does disclose an emergency response component to the Trips system (C74, Rescue Response), and the ability to make reservations for service provides - confirming reservation with a reservation confirmation code (C21).
19. Therefore, it would have been obvious to incorporate the reservation system when scheduling a emergency response call; *however, such a system would be unrealistic, as a emergency*

*response team would lawfully be required to assist in an emergency once on-site, whether the person in need had a password or not.*

20. As per Claims 15, 44, and 53, DeLorme discloses providing a computer network to which said database is operatively coupled.
21. As per Claims 16 and 54, DeLorme discloses wherein said database is operatively coupled to a computer terminal adapted to display said travel information from said database.
22. As per Claims 17 and 55, DeLorme discloses wherein said website is configured to provide said traveler with access to said database of travel information.
23. As per Claims 18 and 56, DeLorme fails to expressly disclose a voice mail system adapted to record and store messages provided by said traveler and further adapted to play back said messages, said voice mail system being accessible by calling a voice mail system telephone number. However, official notice is taken that voice mail system were well known at the time the invention was made as a method for leaving automated messages for users unable to process/answer the call, and would simply be a matter of the user leaving a message at their personal phone number/voice mail, which they could check at their leisure.
24. As per Claims 19 and 57, DeLorme discloses wherein in response to a request from said traveler, a provider of rescue services is dispatched to said geographic location of said traveler (C30 L50-56, "dumbed-down" push button system for rescue services; C74 L11-15, the button could be the routing button).
25. DeLorme fails to expressly disclose whereupon said traveler is transported by said provider of rescue service from said geographic location to a location of greater safety.

Art Unit: 3629

26. However, DeLorme does disclose the ability to request help from rescue services (C30 L50-56), and it would have been obvious for the rescue service personnel to transport the user to a location of greater safety, as it is the obvious role of rescue service/ambulance to provide transport of victims to rescue facility (location of greater safety).
27. As per **independent Claims 20, 84, and 104**, DeLorme discloses a method for providing travel services to a person traveling to a geographic location, comprising: a. a mobile phone, said mobile phone including a button configured to transmit the geographic location of said traveler upon depression of said button; b. wherein in response to a depression of said button of said mobile phone, a rescue service provider is dispatched to said geographic location of said traveler (C30 L50-56, "dumbed-down" push button system for rescue services; C74 L11-15, the button could be the routing button).
28. DeLorme fails to expressly disclose whereupon said traveler is transported by said provider of rescue service from said geographic location to a location of greater safety.
29. However, DeLorme does disclose the ability to request help from rescue services (C30 L50-56), and it would have been obvious for the rescue service personnel to transport the user to a location of greater safety, as it is the obvious role of rescue service/ambulance to provide transport of victims to rescue facility (location of greater safety).
30. Delorme also fails to expressly disclose providing said traveler with a mobile phone.
31. However, Delorme does disclose providing the user with the necessary software (CD-Rom) to operate the trips system (C13 L58-67), and it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the travel user with a phone that would be compatible with the Trips system, in order to increase system effectiveness and

Art Unit: 3629

customer service by providing users with the tools necessary to use the travel information system (software, Phone, Computer, etc.).

32. As per Claims 21 and 85, DeLorme discloses providing a database of travel information; said travel information pertaining to one or more geographic locations, wherein said travel information can be selectively retrieved from said database based on the geographic location to which it pertains.
33. As per Claims 23 and 87, DeLorme discloses providing counseling services (C15 L16-22, private business or public agency uses trips system to provide information/counseling to a user via the telephone or over-the-counter), wherein said providing counseling services comprises receiving information regarding said traveler's circumstances and geographic location (travel POI EOI information), selecting information from said database based on said traveler's circumstances and geographic location and providing said selected information to said traveler (C32-C34).
34. As per Claims 24 and 88, DeLorme discloses providing a phone number, wherein said traveler accesses said counseling services by calling said phone number (C15 L14-32).
35. As per Claims 25 and 89, DeLorme discloses providing an internet web site, wherein said web site is configured to receive information concerning said traveler's circumstances and geographic location, and wherein said web site is operatively coupled to said database of travel information and configured to display said travel information (C10, C75).
36. As per Claims 26 and 90, DeLorme discloses providing said traveler with a password, wherein prior to said transporting of said traveler by said rescue provider, said traveler provides said password to said rescue service provider (Reservation confirmation number).

Art Unit: 3629

37. As per Claims 33 and 97, DeLorme discloses wherein said database is operatively coupled to a computer network.
38. As per Claims 34 and 98, DeLorme discloses wherein said identification information comprises name, phone number, and address information.
39. As per Claims 35 and 99, DeLorme discloses wherein said database is operatively coupled to a computer terminal adapted to display said travel information from said database.
40. As per Claims 36 and 100, DeLorme discloses wherein said website is configured to provide said traveler with access to said database of travel information.
41. As per Claims 37 and 101, DeLorme fails to expressly disclose a voice mail system adapted to record and store message provided by said traveler and further adapted to play back said messages, said voice mail system being accessible by calling a voice mail system telephone number. However, official notice is taken that voice mail system were well known at the time the invention was made as a method for leaving automated messages for users unable to process/answer the call, and would simply be a matter of the user leaving a message at their personal phone number/voice mail, which they could check at their leisure.
42. As per Claims 105 and 106, DeLorme discloses wherein said mobile communication device is a personal computer or a satellite phone (Fig 1A, 9B).
43. As per **independent Claims 58 and 74**, DeLorme discloses a method for providing travel services using a computer network, comprising: a. providing a computer network; b. providing a database of travel information operatively coupled to said computer network, said database including identification information for one or more service providers; and c. providing said traveler with a means for selectively accessing information pertaining to said

Art Unit: 3629

traveler's circumstances and geographic location from said database (Abstract, C32-C34, C71-C75).

44. DeLorme fails to expressly disclose providing weather information, traffic information, road construction information, terrorism information, legal information, and suggested vaccinations.
45. However, DeLorme does disclose saving and providing multitude of travel information to the user (Abstract, Fig. 1C), including one or more services and service information (Abstract, Fig. 1C, who? where? how?; Fig.5D, Restaurants); and it would have been obvious to one of ordinary skill in the art at the time the invention was made to store and provide any information that would be beneficial to travelers (route information, safety information, emergency information), for the purpose of offering a method for providing travel services to a person traveling to a geographic location, with the advantage of increasing system effectiveness and customer service by offering users all the necessary/beneficial information available for their upcoming travel plans.
46. As per Claims 63 and 79, DeLorme discloses wherein said identification information comprises name, phone number, and address information (Fig.5D).
47. As per Claims 64 and 80, DeLorme discloses wherein said means for selectively accessing information comprises a computer terminal operatively coupled to said database (Figs. 1A and 2, C7 L22-34)
48. As per Claims 65 and 81, DeLorme discloses wherein said means for selectively accessing information comprises an Internet website operatively coupled to said database (C10).

Art Unit: 3629

49. As per Claims 66 and 82, DeLorme discloses wherein said means for selectively accessing information comprises a system of providing counseling services (C15 L16-22, private business or public agency uses trips system to provide information/counseling to a user via the telephone or over-the-counter), wherein said providing counseling services comprises receiving information regarding said traveler's circumstances and geographic location, selecting information from said database based on said traveler's circumstances and geographic location and providing said selected information to said traveler (Who, where, when, how?).
50. As per Claims 67 and 83, DeLorme discloses providing a telephone number, wherein said traveler accesses said counseling services by calling said telephone number (C15 L14-32).
51. As per **independent Claim 68**, DeLorme discloses a method for providing travel services to a person traveling to a geographic location, comprising: a. providing a telephone number; b. providing counseling services (C15 L16-22, private business or public agency uses trips system to provide information/counseling to a user via the telephone or over-the-counter), wherein said providing counseling services comprises receiving information regarding said traveler's circumstances and geographic location, and providing information adapted to said traveler's circumstances and said traveler's geographic location (Traveling direction, POI, EOI), wherein said provided information concerns at least one selected from the group consisting of service provider identification information for one or more service providers, and wherein said traveler accesses said counseling services by calling said telephone number (Abstract, C15 L14-32, C32-C34, C71-C75).

Art Unit: 3629

52. Delorme fails to expressly disclose providing service/information comprising: weather information, traffic information, legal information, and suggested vaccinations.
53. However, DeLorme does disclose saving and providing multitude of travel information to the user (Abstract, Fig. 1C), including one or more services and service information (Abstract, Fig. 1C, who? where? how?; Fig.5D, Restaurants); and it would have been obvious to one of ordinary skill in the art at the time the invention was made to store and provide any information that would be beneficial to travelers (route information, safety information, emergency information), for the purpose of offering a method for providing travel services to a person traveling to a geographic location, with the advantage of increasing system effectiveness and customer service by offering users all the necessary/beneficial information available for their upcoming travel plans.
54. As per Claims 69-72, DeLorme fails to expressly disclose providing information regarding all the service providers disclosed in the instant application; however, Delorme does disclose providing service provider information to a multitude of service provider types (Abstract, Fig. 1C), and it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate a large variety of service providers with the system in order to increase the systems effectiveness and customer service by offering a large variety of relevant customer travel-related information.
55. As per Claim 73, DeLorme discloses wherein said identification information comprises name, phone number, and address information (Fig.5D).
56. As per new **independent Claim 109**, DeLorme discloses a system for providing travel services to a person traveling to a geographic location comprising: a. a database of travel-

related information pertaining to one or more geographic locations )Abstract, Fig. 1C, who? where? how?; Fig.5D, Restaurants); b. a mobile communications device operatively coupled to the database and carried by the traveling person (Fig.9B, 907); c. wherein any of the travel-related information can be selectively retrieved from the database by the mobile communications device based on the geographic location to which it pertains (Fig.9B, 907, 939); and d. wherein the mobile communications device includes an emergency button that, when depressed, transmits a current geographic location of the traveling person and dispatches a provider of rescue service to the current geographic location of the traveling person (C30 L50-56, "dumbed-down" push button system for rescue services; C74 L11-15, the button could be the routing button).

57. However, DeLorme does disclose saving and providing multitude of travel information to the user (Abstract, Fig. 1C), including one or more services and service information (Abstract, Fig. 1C, who? where? how?; Fig.5D, Restaurants); and it would have been obvious to one of ordinary skill in the art at the time the invention was made to store and provide any information that would be beneficial to travelers (route information, safety information, emergency information), for the purpose of offering a method for providing travel services to a person traveling to a geographic location, with the advantage of increasing system effectiveness and customer service by offering users all the necessary/beneficial information available for their upcoming travel plans.

58. **Claims 10, 14, 27, 28, 48, 52, 91, 92, 102, 103, 107, 108** are rejected under 35

**U.S.C. 103(a) as being unpatentable over DeLorme in view of Marcon (US 2001/0052142 A1).**

59. As per **independent Claims 102 and 103**, DeLorme discloses a method of providing travel services to a person traveling to a geographic location, comprising: a. associating with one or more service providers; c. providing said traveler with a password (C37 L3-15, registration password); e. a mobile phone including a button configured to transmit the geographic location of said traveler upon depression of said button (GPS location system); f. providing a first telephone number; h. providing a database of travel information, said travel information pertaining to one or more geographic locations, said database comprising the names, addresses and phone numbers of said service providers, wherein said travel information can be selectively retrieved from said database based on the geographic location to which it pertains, and wherein said database is further operatively coupled to a computer terminal adapted to display said travel information from said database; k. providing an internet web site, wherein said web site is configured to receive information concerning said traveler's circumstances and geographic location, wherein said web site is operatively coupled to said database of travel information and configured to display said travel information; l. providing counseling services to said traveler (C15 L16-22, private business or public agency uses trips system to provide information/counseling to a user via the telephone or over-the-counter), wherein said providing counseling services comprises receiving information regarding said traveler's geographic location and circumstances, selecting information from said database based on said traveler's geographic location and circumstances, and providing said selected information to said traveler, wherein said traveler accesses said counseling services by at least one of calling said first telephone number or by transmitting a request for said counseling services via said web site; m. wherein in response to a request from said traveler

or a depression of said button of said mobile phone, a rescue service provider is dispatched to said geographic location of said traveler (C30 L50-56, "dumbed-down" push button system for rescue services; C74 L11-15, the button could be the routing button).

60. Delorme fails to expressly disclose providing all the services/information (weather information, traffic information, road construction information, terrorism information, legal information, and suggested vaccinations) provided in the instant invention.
61. However, DeLorme does disclose saving and providing multitude of travel information to the user (Abstract, Fig. 1C), including one or more services and service information (Abstract, Fig. 1C, who? where? how?; Fig.5D, Restaurants); and it would have been obvious to one of ordinary skill in the art at the time the invention was made to store and provide any information that would be beneficial to travelers (route information, safety information, emergency information), for the purpose of offering a method for providing travel services to a person traveling to a geographic location, with the advantage of increasing system effectiveness and customer service by offering users all the necessary/beneficial information available for their upcoming travel plans.
62. Delorme fails to expressly disclose providing said traveler with an identification card including name and address of said traveler and a photograph of said traveler.
63. However, Delorme does disclose registering users and providing membership information on hand-held devices (C21, C37), and Official notice is taken that I.D. Cards were well known at the time the invention was made as a form of user identification, and it would have been obvious to issue users ID cards as an additional form of membership identification
64. Delorme fails to expressly disclose providing said traveler with a mobile phone.

Art Unit: 3629

65. However, Delorme does disclose providing the user with the necessary software (CD-Rom) to operate the trips system (C13 L58-67), and it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the travel user with a phone that would be compatible with the Trips system, in order to increase system effectiveness and customer service by providing users with the tools necessary to use the travel information system (software, Phone, Computer, etc.).
66. Delorme fails to expressly providing a voice mail system adapted to record and store messages provided by said traveler, and further adapted to play back said messages; j. providing a second phone number for accessing said messages provided by said traveler. However, official notice is taken that voice mail system were well known at the time the invention was made as a method for leaving automated messages for users unable to process/answer the call, and would simply be a matter of the user leaving a message at their personal phone number/voice mail, which they could check at their leisure.
67. DeLorme fails to expressly disclose providing said traveler with a password, wherein prior to said transporting of said traveler by said rescue service provider, said traveler provides said password to said rescue service provider.
68. However, Delorme does disclose an emergency response component to the Trips system (C71-C75), and the ability to make reservations for service provides - confirming reservation with a reservation confirmation code (C21).
69. Therefore, it would have been obvious to incorporate the reservation system when scheduling a emergency response call; however, such a system would be unrealistic, as a emergency

Art Unit: 3629

response team would lawfully be required to assist in an emergency once on-site, whether the person in need had a password or not.

70. DeLorme fails to expressly disclose providing information regarding all the service providers disclosed in the instant application; however, Delorme does disclose providing service provider information to a multitude of service provider types (Abstract, Fig. 1C), and it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate a large variety of service providers with the system in order to increase the systems effectiveness at offering relevant customer information.
71. DeLorme fails to expressly disclose whereupon said traveler is transported by said provider of rescue service from said geographic location to a location of greater safety.
72. However, DeLorme does disclose the ability to request help from rescue services (C30 L50-56), and it would have been obvious for the rescue service personnel to transport the user to a location of greater safety, as it is the obvious role of rescue service/ambulance to provide transport of victims to rescue facility (location of greater safety).
73. Finally, Delorme fails to expressly disclose providing said traveler with an emergency kit, said emergency kit comprising food and water; and providing said traveler with protective clothing adapted for use in said geographic location.
74. However, Marcon discloses protective clothing and a emergency kit to be used by travelers (abstract, Para 0022), and it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the user with a equipment that would best prepare the user for travel, in order to ensure a full travel outfitting service, wherein complete travel preparation is provided to the customer.

Art Unit: 3629

75. As per Claims 10, 27, 48 and 91, DeLorme and *Marcon* disclose providing said traveler with an emergency kit, said emergency kit comprising food and water (Marcon: abstract, Para 0022).
76. As per Claims 14, 28, 52 and 92, DeLorme and Marcon disclose providing said traveler with protective clothing adapted for use in said geographic location (See rejection of independent Claims 102 and 103).
77. As per Claims 107 and 108, DeLorme and *Marcon* disclose wherein said emergency kit further comprises first aid supplies and/or at least one tool (Marcon: abstract, Para 0022).

***Response to Arguments***

78. Applicant's arguments filed 12/4/2006, with respect to Claims 1-109, have been considered but are not persuasive. The rejection will remain as FINAL, based on the cited prior art.
79. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
80. The Applicant has made the argument that the cited prior art fails to teach or disclose saving and later accessing geographic location specific information, which includes at least current

Art Unit: 3629

suggested vaccination and terrorist information.

81. However, DeLorme does disclose saving and providing multitude of travel information to the user (Abstract, Fig. 1C), including one or more services and service information (Abstract, Fig. 1C, who? where? how?; Fig.5D, Restaurants); and it would have been obvious to one of ordinary skill in the art at the time the invention was made to store and provide any information that would be beneficial to travelers (route information, safety information, emergency information), for the purpose of offering a method for providing travel services to a person traveling to a geographic location, with the advantage of increasing system effectiveness and customer service by offering users all the necessary/beneficial information available for their upcoming travel plans.
82. Furthermore, the Applicant has made the argument that the types of emergency information stored/provided would be functional. However, as stated above, the Examiner has indicated the multiple types of information would be obvious (no non-functional argument is used); therefore, the argument is moot.
83. The Applicant has made the argument that the cited prior art fails to teach or suggest a two step method whereby in response to the traveler depressing a single button on his/her mobile phone (provided to the user), two things occur: a geographic location is transmitted, and a rescue service provider is dispatched to the geographic location.
84. However, as indicated in the rejection above, Delorme does disclose the use of a mobile communication device (phone) with an emergency "push button" (C30 L50-56, "dumbed-down" push button system for rescue services; C74 L11-15, the button could be the routing button) and the ability for the Trips system to automatically determine the devices location

Art Unit: 3629

through GPS (C37 L58-65, C72 L1-6, GPS), and it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the travel user with a phone that would be compatible with the Trips system, in order to increase system effectiveness and customer service by providing users with the tools necessary to use the travel information system (software, Phone, Computer, etc.).

85. Finally, the Trips system would be considered by the Examiner to be an advancement on the claimed invention, as it is capable of working with communication devices the user already possesses, and would by-pass the expense of providing a phone to users.

### *Conclusion*

86. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Ouellette whose telephone number is (571) 272-6807. The examiner can normally be reached on Monday through Thursday, 8am - 5:00pm.

87. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on (571) 272-6812. The fax phone numbers for the organization where this application or proceeding is assigned (571) 273-8300 for all official communications.

88. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Office of Initial Patent Examination whose telephone number is (703) 308-1202.
